Job Summary

The Team Lead – Technical reports to the Manager Fast Ferries and has overall responsibility for the proper maintenance of the vessels. Provides technical/engineering support for maintenance activities and major repair projects and ensures adequate systems are in place for the recording of maintenance activities. The incumbent plans and executes dry-docking exercises, prepares budgets and implements effective cost control measures on ship spares and docking requirements. The role also includes the performance of technical compliance audits.

Responsibilities

- Oversees the daily operations of maintenance and repair, budgeting survey schedules, onboard general assessment of vessels, inspections and dry-docking etc.
- Ensures the assigned vessels are technically operational or otherwise managed accordingly.
- Liaises with marine officers on technical and operational matters including vessel performance, etc.
- Determines repair specifications for dry-docking and maintenance and attend to vessel dry docking, repairs and survey when required.
- Performs evaluation for dry-docking, repair quotes and selection of shipyards for repair works.
- Provides documented reports upon completion of dry-docking, including summaries of works performed, operational budgets, and actual expenditures.
- Identifies technical and operational supplies required for the vessels at economical rates.
- Ensures that all copies of statutory and equipment certificates (life rafts, compasses, etc.) are properly maintained and documented.
- Performs monthly review of logs, processes and attend to vessel inspections.
- Monitors technical status of vessel with relation to class certificate and survey.
- Supervises contractors’ repair/maintenance of vessels.
- Performs technical compliance audits and investigation on defects/failures on a regular scheduled basis to ensure conformance.
- Works closely with the HSE Management team to ensure smooth and successful implementation of QHSE system and policies for the Division.
Responsibilities (Continued)

- Performs systematic review of recommended codes, guidelines and standards and ensure compliance with Quality & Safety Management standards
- Develops, plans and executes inspection programs in accordance with company policies and procedures.
- Supervises marine personnel in accordance with company policies and procedures.
- Monitors ongoing state of docks, ramps, structures, terminal buildings and other buildings, yard areas and other company facilities and ensure adherence to regulatory and industry standards; maintain annual inspection program
- Assists with the ongoing implementation and development of SMS system as pertains to the domestic vessels.
- Manages relationship with classification society and regulatory bodies.
- Ensures the renewal of all statutory and regulatory certificates.
- Performs any other related duties assigned by the Manager Fast Ferries.

Minimum Requirements

**Qualification/ Experience and Training:**
- An Engineering Class 1 Certificate Of Competency or Degree in a Maritime discipline with at least 7 years of related industry experience.
- A Class 2 Engineering Certificate with at least 10 years of related industry experience.
- Fast Ferry experience is a critical asset.

**Additionally, the incumbent must demonstrate:**
- An appreciation of the complexities of working in a fast ferry environment.
- Strong organisational and communication skills.
- Computer literacy and report writing skills
- Strong project management skills
- Knowledge of vessel and terminal operating processes, procedures, and technology.
- In-depth knowledge of statutory and regulatory rules and requirements.
- A willingness to work a flexible schedule.
- Considerable knowledge in Engineering re Fast Ferry
- Analytical and highly proactive in technical trouble shooting and problem solving skills
