Bulletin 369

January 13, 2023

Dear Stakeholders,

UPDATE: Disruption in Container Terminal Operation System (NAVIS)

Further to Bulletin 368, PPOS wishes to inform our customers that our Container Terminal Operating System (NAVIS) has resumed limited functionality.

Our technicians are working assiduously to fully resolve the issue. We anticipate that the system will be restored to full functionality by 1600 hours today.

Presently PPOS has reverted to a manual system in an effort to actively maintain the Vessel operations and provide the requested services to you all.

Gate operations are limited, however, the receipt of Empty and Export units are being facilitated. Delivery of Full and Empty units cannot be fully accommodated until the system has been restored to its full capacity.

Cargo Accounts will be open between 1600 - 1900 hours today to facilitate the processing of documents.

We continue to monitor all aspects of our operations closely and all resources have been deployed in an effort to have the situation rectified urgently.

PPOS apologizes for any inconvenience caused by the situation, and thank you for your understanding and patience in this matter.

Respectfully,

.....
Mr. Nazruddin Hosein

Divisional Manager, Operations (Ag.)
